Indoor Range at the Airport

Indoor range at the Airport. This was designed for .22 rifles and pistols. It may also be used for centerfire handguns, but only with mild TARGET LOADS. It is absolutely prohibited to use full metal jacketed and-or hot handgun loads and centerfire rifles indoors. They will ruin the backstop and the traps. Club members have spent a lot of money and a lot of labor building the backstop and traps. Don't ruin them with careless shooting.

The Outdoor Airport Range is CLOSED. Shooting will only occur with supervision by a Rifle Club Director or Officer or at an Alliance Rifle Club scheduled match. All trespassers will be prosecuted.

PRACTICE DAYS: The Club will arrange and announce some Practice Days when the range will be open for practice and sighting in. It will be supervised by at least one member of the Board.
